# Contents of Volume 80

*Number 1, 7 September 1979*

COPE, D. K. and TUCKWELL, H. C., Firing Rates of Neurons with Random Excitation and Inhibition . . . . . 1

REIFF, T. R., Colloid Osmotic Homeostasis in Humans: Intravascular Oncotic Energy Under Varying Gravitational Potential . . 15

YOCKEY, H. P., Do Overlapping Genes Violate Molecular Biology and the Theory of Evolution? . . . . . 21

TYSON, J. J., Periodic Enzyme Synthesis: Reconsideration of the Theory of Oscillatory Repression . . . . . 27

NICHOL, I. W., WILLS, P. R. and WINZOR, D. J., An Examination of the Forms of Scatchard Plots of Binding Results Outside of Domains of Sigmoidality . . . . . 39

CHAPMAN, R. W., AVISE, J. C. and ASMUSSEN, M. A., Character Space Restrictions and Boundary Conditions in the Evolution of Quantitative Multistate Characters . . . . . 51

STASIAK, A. and KLOPOTOWSKI, T., Four-stranded DNA Structure and DNA Base Methylation in the Mechanism of Action of Restriction Endonucleases . . . . . 65

CHAY, T. R., pH Oscillations in Transport Process . . . . 83

MILLER, R. G., A Model for Lamellar Myelin . . . . . 101

HEWITT, J. A., Surf-Riding Model for Cell Capping . . . . 115

CROWLEY, P. H., Predator-mediated Coexistence: an Equilibrium Interpretation . . . . . 129

LETTERS TO THE EDITOR

SNYDER, G., Thermodynamics and Body Temperature . . 145

ROSEN, R., Patching and Capping of Cell Membranes Receptors as Examples of Morphogenetic Movement . . . . . 149

*Number 2, 21 September 1979*

VOLKENSTEIN, M. V., Mutations and the Value of Information . 155

ANAN, Y. and GO, N., Solitary Wave and Spatially Locked Solitary pattern in a Chemical Reaction System . . . . . 171

SO, J. W. H., A Note on the Global Stability and Bifurcation Phenomenon of a Lotka–Volterra Food Chain . . . . . 185

SMITH, R. H. and MEAD, R., On Predicting Extinction in Simple Population Models. I. Stochastic Linearization . . . . . 189

NAORA, H., DEACON, N. J. and FRY, K. E., Similarity Between 5′- and 3′-Terminal Nucleotide Sequences and Double-Standard RNA-Derived Sequences of Eukaryotic mRNA . . . . . 205

WALLER, D. M., Models of Mast Fruiting in Trees . . . . . 223

CALVERT, P. D., NICHOL, L. W. and SAWYER, W. H., Binding Equations for Interacting Systems Comprising Multivalent Acceptor and Bivalent Ligand: Application to Antigen–Antibody Systems . . . . . 233

COUZIN, D. and PAPWORTH, D. G., The Over-dispersion Between Cells of Chromosomal Aberrations . . . . . 249

RIBEIRO, J. A., Purinergic Modulation of Transmitter Release . . 259

HANNON, B., Total Energy Costs in Ecosystems . . . . . 271

LETTERS TO THE EDITOR

PETTY, H. R. and BAIRD, J. K., On the Polarizability of Macromolecules in Solution . . . . . 295

MEGANATHAN, R., Why has the "Nitrogenase Plasmid" Snubbed the Pseudomonads! . . . . . 301

NOTICES . . . . . 305

*Number 3, 7 October 1979*

HAINES, T. H., A Proposal on the Function of Unsaturated Fatty Acids and Ionic Lipids: The Role of potential Compaction in Biological Membranes . . . . . 307

POPEL, A. S., Diffusion in Tissue Slices with Metabolism Obeying Michaelis–Menten Kinetics . . . . . 325

ABERNETHY, J. D., The Exponential Increase in Mortality Rate with Age Attributed to Wearing-out of Biological Components . . 333

WHITEHEAD, E. P., The Structure of Steady-state Enzyme Kinetic Equations: A Graph-theoretical Algorithm for Obtaining Conditions for Reduction in Degree by Common-factor Cancellation . . . . . 355

THAKUR, A. K. and RODBARD, D., Graphical Aids to Interpretation of Scatchard Plots and Dose–Response Curves . . . . . 383

CHAPMAN, J. B., KOOTSEY, J. M. and JOHNSON, E. A., A Kinetic Model for Determining the Consequences of Electrogenic Active Transport in Cardiac Muscle . . . . . 405

MISHRA, R. K., RAO, G. S., TYAGI, R. S. and GANDHI, S., A Study on the Intermolecular Association in Living Systems. IV. Studies on a Model Molecular Fragment (Pentane) . . . . . 435

LETTER TO THE EDITOR

SCHENZLE, D., On Estimating Parameters of the Binomial Model for Transmitter Release at Synapses . . . . . 441

*Number 4, 21 October 1979*

ECONOMOS, A. C., On Structural Theories of Basal Metabolic Rate . 445

KING-HELE, J. A., Approximate Analytical Solutions for Water and Solute Flow in Intercellular Spaces with a Leaky Tight Junction . 451

ASSIMACOUPLOS, D. and EVANS, F. J., A Qualitative Method for Analysis of Prey–Predator Systems Under Enrichment . . 467

PRABHAKARAN, M. and PONNYSWAMY, P. K., The Spatial Distribution of Physical, Chemical, Energetic and Conformational Properties of Amino Acid Residues in Globular Proteins . . 485

PAPADOPOULLOS, M. S., ANNINOS, P. A. and ZENONE, S., Memory Topology of Neural Nets . . . . . 505

MITZ, M. A., $CO_2$ Biodynamics: A New Concept of Cellular Control . 537

SEGHERS, M., A Qualitative Study of an Idotypic Cyclic Network . 553

MACDONALD, N., Simple Aspects of Foodweb Complexity . . 577

LETTER TO THE EDITOR

ZACIU, C. and MARGINEANU, D.-G., Membrane Noise and Microscopical Significance of Critical Slopes of Ramp Voltages . . . . . 589

## Index to Volume 80

ABERNETHY, J. D., The exponential increase in mortality rate with age attributed to wearing-out of biological components, 333
Algorithm, graph-theoretical, for obtaining conditions for reduction in degree by common-factor cancellation; the structure of steady-state enzyme kinetic equations, 355
Amino acid residues in globular proteins, the spatial distribution of physical, chemical, energetic and conformational properties of, 485
ANAN, Y. and GO, N., Solitary wave and spatially locked solitary pattern in a chemical reaction system, 171
ANNINOS, P. A. (see PAPADOPOULLOS, M. S.), 505
Antigen–antibody systems, application to; binding equations for interacting systems comprising multivalent acceptor and bivalent ligand, 233
ASMUSSEN, M. A. (See CHAPMAN, R. W.), 51
ASSIMACOUPLOS, D. and EVANS, F. J., A qualitative method for analysis of prey–predator systems under enrichment, 467
AVISE, J. C. (see CHAPMAN, R. W.), 51

BAIRD, J. K. (See PETTY, H. R.), 295
Bifurcation phenomenon and global stability of a Lotka–Volterra food chain, a note on, 185
Binding equations for interacting systems comprising multivalent acceptor and bivalent ligand: application to antigen–antibody systems, 233
Binomial model for transmitter release at synapses, on estimating parameters of (letter), 441
Body temperature and thermodynamics (letter), 145

CALVERT, P. D., NICHOL, L. W. and SAWYER, W. H., Binding equations for interacting systems comprising multivalent acceptor and bivalent ligand: application to antigen–antibody systems, 233
Capping, cell, surf-riding model for, 115
Capping and patching of cell membranes receptors as examples of morphogenetic movement, 149
Cardiac muscle, a kinetic model for determining the consequences of electrogenic active transport in, 405
Cell capping, surf-riding model for, 115
Cellular control, a new concept of; $CO_2$ biodynamics, 537
CHAPMAN, J. B., KOOTSEY, J. M. and JOHNSON, E. A., A kinetic model for determining the consequences of electrogenic active transport in cardiac muscle, 405
CHAPMAN, R. W., AVISE, J. C. and ASMUSSEN, M. A., Character space restrictions and boundary conditions in the evolution of quantitative multistate characters, 51
Character space restrictions and boundary conditions in the evolution of quantitative multistate characters, 51

CHAY, T. R., pH oscillations in transport process, 83
Chemical reaction system, solitary wave and spatially locked solitary wave in, 171
Chromosomal aberrations, the over-dispersion between cells of, 249
$CO_2$ biodynamics: a new concept of cellular control, 537
Coexistence, predator-mediated: an equilibrium interpretation, 129
Colloid osmotic homeostasis in humans: intravascular oncotic energy under varying gravitational potential, 15
COPE, D. K. and TUCKWELL, H. C., Firing rates of neurons with random excitation and inhibition, 1
COUZIN, D. and PAPWORTH, D. G., The over-dispersion between cells of chromosomal aberrations, 249
CROWLEY, P. H., Predator-mediated coexistence: an equilibrium interpretation, 129
Cyclic network, idotypic, a qualitative study of, 553

DEACON, N. J. (see NAORA, H.), 205
Diffusion in tissue slices with metabolism obeying Michaelis–Menten kinetics, 325
DNA structure, four-stranded, and DNA base methylation in the mechanism of action of restriction endonucleases, 65
Dose–response curves and Scatchard plots, graphical aids to interpretation of, 383

ECONOMOS, A. C., On structural theories of basal metabolic rate, 445
Ecosystems, total energy costs in, 271
Electrogenic active transport in cardiac muscle, a kinetic model for determining the consequences of, 405
Energy costs, total, in ecosystems, 271
Enzyme kinetic equations, steady-state, the structure of; a graph-theoretical algorithm for obtaining conditions for reduction in degree by common-factor cancellation, 355
Enzyme synthesis, periodic: reconsideration of the theory of oscillatory repression, 27
Eukaryotic mRNA, similarity between 5′- and 3′-terminal nucleotide sequences and double-stranded RNA-derived sequences of, 205
EVANS, F. J. (See ASSIMACOUPLOS, D.), 467
Evolution theory and molecular biology, are they violated by overlapping genes?, 21
Extinction prediction in simple population models: stochastic linearization, 189

Firing rates of neurons with random excitation and inhibition, 1
Food chain, Lotka–Volterra, a note on the global stability and bifurcation phenomenon of, 185
Foodweb complexity, simple aspects of, 577
FRY, K. E. (See NAORA, H.), 205

GANDHI, S. (See MISHRA, R. K.), 435
Genes, overlapping, do they violate molecular biology and the theory of evolution?, 21
Globular proteins, the spatial distribution of physical, chemical, energetic and conformational properties of amino acid residues in, 485
GO, N. (See ANAN, Y.), 171

Gravitational potential, intravascular oncotic energy under varying; colloid osmotic homeostasis in humans, 15

HAINES, T. H., A proposal on the function of unsaturated fatty acids and ionic lipids: the role of potential compaction in biological membranes, 307
HANNON, B., Total energy costs in ecosystems, 271
HEWITT, J. A., Surf-riding model for cell capping, 115
Humans, colloid osmotic homeostasis in; intravascular oncotic energy under varying gravitational potential, 15

Idiotypic cyclic network, a qualitative study of, 553
Information, mutations and the value of, 155
Interacting systems comprising multivalent acceptor and bivalent ligand, binding equations for; application to antigen–antibody systems, 233
Intercellular spaces with a leaky tight junction, approximate analytical solutions for water and solute flow in, 451
Intermolecular association in living systems, a study on; studies on a model molecular fragment (pentane), 435
Intravascular oncotic energy under varying gravitational potential; colloid osmotic homeostasis in humans, 15
Ionic lipids and unsaturated fatty acids, a proposal on the function of; the role of potential compaction in biological membranes, 307

JOHNSON, E. A. (See CHAPMAN, J. B.), 405

KING-HELE, J. A., Approximate analytical solutions for water and solute flow in intercellular spaces with a leaky tight junction, 451
KLOPOTOWSKI, T. (See STASIAK, A.), 65
KOOTSEY, J. M. (see CHAPMAN, J. B.), 405

Lotka–Volterra food chain, a note on the global stability and bifurcation phenomenon of, 185

MACDONALD, N., Simple aspects of foodweb complexity, 577
Macromolecules in solution, on the polarizability of (letter), 295
MARGINEANU, D.-G. (See ZACIU, C.). 589
Mast fruiting in trees, models of, 223
MEAD, R., (See SMITH, R. H.), 189
MEGANATHAN R., Why has the "nitrogenase plasmid" snubbed the pseudomonads! (letter), 301
Membrane noise, and mocroscopical significance of critical slopes of ramp voltages (letter), 589
Membranes, biological, the role of potential compaction in; a proposal on the function of unsaturated fatty acids and ionic lipids, 307
Membranes receptors of cells, patching and capping as examples of morphogenetic movement, 149
Memory topology of neural nets, 505
Messenger RNA, eukaryotic, similarity between 5′- and 3′-terminal nucleotide sequences and double-stranded RNA-derived sequences of, 205

Metabolic rate, basal, on structural theories of, 445
Metabolism obeying Michaelis–Menten kinetics, diffusion in tissue slices with, 325
Michaelis–Menten kinetics, diffusion in tissue slices with metabolism obeying, 325
MILLER, R. G., A model for lamellar myelin, 101
MISHRA, R. K., RAO, G. S., TYAGI, R. S. and GANDHI, S., A study on the intermolecular association in living systems. IV. Studies on a model molecular fragment (pentane), 435
MITZ, M. A., $CO_2$ biodynamics: a new concept of cellular control, 537
Model, binomial, for transmitter release at synapses, on estimating parameters of (letter), 441
Model, kinetic, for determining the consequences of electrogenic active transport in cardiac muscle, 405
Model for lamellar myelin, 101
Model molecular fragment (pentane); a study on the intermolecular association in living systems, 435
Model, surf-riding, for cell capping, 115
Models of mast fruiting in trees, 223
Models, population, simple, on predicting extinction in; stochastic linearization, 189
Molecular biology and the theory of evolution, are they violated by overlapping genes?, 21
Morphogenetic movement, patching and capping of cell membranes receptors as examples of, 149
Mortality rate: the exponential increase with age attributed to wearing-out of biological components, 333
Muscle, cardiac, a kinetic model for determining the consequences of electrogenic active transport in, 405
Mutations and the value of information, 155
Myelin, laminar, a model for, 101

NAORA, H., DEACON, N. J. and FRY, K. E., Similarity between 5′- and 3′-terminal nucleotide sequences and double-stranded RNA-derived sequences of eukaryotic mRNA, 205
Neural nets, memory topology of, 505
Neurons with random excitation and inhibition, firing rates of, 1
NICHOL,, I. W., WILLS, P. R. and WINZOR, D. J., An examination of the forms of Scatchard plots of binding results outside of domains of sigmoidality, 39
NICHOL, L. W. (See CALVERT, P. D.), 233
"Nitrogenase plasmid", why has it snubbed the pseudomonads! (letter), 301
Noise, membrane, and microscopical significance of critical slopes of ramp voltages (letter), 589
Nucleotide sequences, 5′- and 3′-terminal, and double-stranded RNA-derived sequences of eukaryotic mRNA, similarity between, 205

Oscillatory repression, reconsideration of the theory of; periodic enzyme synthesis, 27
Over-dispersion between cells of chromosomal aberrations, 249

PAPADOPOULLOS, M. S., ANNINOS, P. A. and ZENONE, S., Memory topology of neural nets, 505
PAPWORTH, D. G. (See COUZIN, D.), 249

'atching and capping of cell membranes receptors as examples of morphogenetic movement, 149
'entane, a model molecular fragment; a study on the intermolecular association in living systems, 435
'eriodic enzyme synthesis: reconsideration of the theory of oscillatory repression, 27
'ETTY, H. R. and BAIRD, J. K., On the polarizability of macromolecules in solution (letter), 295
)H oscillations in transport process, 83
'olarizability of macromolecules in solution (letter), 295
'ONNUSWAMY, P. K. (See PRABHAKARAN, M.), 485
'OPEL, A. S., Diffusion in tissue slices with metabolism obeying Michaelis–Menten kinetics, 325
'opulation models, simple, on predicting extinction in; stochastic linearization, 189
'otential compaction role in biological membranes; a proposal on the function of unsaturated fatty acids and ionic lipids, 307
'RABHAKARAN, M. and PONNUSWAMY, P. K., the spatial distribution of physical, chemical, energetic and conformational properties of amino acid residues in globular proteins, 485
Predator-mediated coexistence: an equilibrium interpretation, 129
Prey–predator systems under enrichment, a qualitative method for analysis of, 467
Pseudomonads, why have they been snubbed by the "nitrogenase plasmid"! (letter), 301
Purinergic modulation of transmitter release, 259

Ramp voltages, membrane noise and microscopical significance of critical slopes of (letter), 589
RAO, G. S. (see MISHRA, R. K.), 435
REIFF, T. R., Colloid osmotic homeostasis in humans: intravascular oncotic energy under varying gravitational potential, 15
Restriction endonucleases, four-stranded DNA structure and DNA base methylation in the mechanism of action of, 65
RIBEIRO, J. A., Purinergic modulation of transmitter release, 259
RODBARD, D. (see THAKUR, A. K.), 283
ROSEN, R., Patching and capping of cell membranes receptors as examples of morphogenetic movement (letter), 149

SAWYER, W. H. (See CALVERT, P. D.), 233
Scatchard plots of binding results outside of domains of sigmoidality, an examination of the forms of, 39
Scatchard plots and dose-response curves, graphical aids to interpretation of, 383
SCHENZLE, D., On estimating parameters of the binomial model for transmitter release at synapses (letter), 441
